PROTECTION POT CONVERSION FOR VOLKMANN 05/05C BA3 TO 05/05C BA4

To Convert 05 BA3 Aluminum Protection Pots to 05 BA4 Stainless Steel Protection Pots

Step 1. Change the injector on the spindle to EE480155 metal injector for 05 BA4 for twisting or EE481381 05 BA4 metal injector plug for cabling.

Step 2. Select the correct 05, BA4 stainless steel protection pot complete below.

A.) For 2/1 Twisting

EE440422 Pot Complete, Two for One, Stainless Steel, 05, BA4, DT1 (2 Magnets)*

EE440423 Pot Complete, Two for One, Stainless Steel, 05, BA4, DT1 (3 Magnets)*

**Does not include feed bushing or tension device*

B.) For Cabling

EE440421 Pot Complete, Cabling, Stainless Steel, 05C, BA4, DT1 (2 Magnets)*

EE440440 Pot Complete, Cabling, Stainless Steel, 05C, BA4, DT1 (3 Magnets)*

**Does not include package centering*

Why is this conversion beneficial? The 05/05C BA4 stainless pot is a superior and more durable design compared to the 05/05C BA3 pot. Furthermore, purchasing new 05/05C BA3 pots may prove challenging due to availability concerns.

This conversion can be done as a per spindle upgrade, but the preferred method is to change one complete machine-side at a time. Use any remaining good BA3 protection pots until necessary to upgrade another machine-side. This is the best approach and value for upgrading your BA3 twister/cabler pots to the improved BA4 design type.

Please contact EPIC for assistance and a quote to upgrade your 05 BA3 twister/cabler protection pots!
